

Will you have a student with a fetal alcohol spectrum disorder (FASD) or prenatal alcohol exposure (PAE) **this upcoming school year?**

We need your help to test out a new website for teachers!

Researchers at the University of Rochester have developed a website for teachers about FASD. We are looking for teachers to try out the website this upcoming school year (2023-2024). We want to know if teachers like the website, if it's helpful, and if it's functional.

Teachers who participate can earn up to \$75-100.

You are eligible to participate if...

- You are an educational professional of grades K-5 in the United States
- You will have at least one child with FASD or PAE between the ages of 5-12 this upcoming year in your class

If you are interested, go to fmfconnect.com to learn more about the study and find out if you are eligible.

If you have any questions or concerns, please contact Carson Kautz-Turnbull at ckautz@ur.rochester.edu
